Subject:

We are opposed to moving the contaminated material anywhere out of the area. Because there is no public access to the immediate area where the dam is, it is in the best interest of all to keep it in close proximity to where it exists now.

The traffic hazards and dangerous conditions hauling the contaminated waste on hiway 200 are immeasurable. The public should not be subjected to thousands of truckloads of material on state thoroughfares. When an accident does occur, and it will, all people in favor of this ill-conceived venture will be subject to lawsuits.

Respectfully,

Robert and Kathleen Zuelke
